The screenshot shows the RaUI software interface. The top menu includes Profile, Network, Advanced, Statistics, WMM, WPS, Radio on/off, and About. The main window displays a list of detected WiFi networks with columns for SSID, Channel, Signal strength, and AP List. Below the list are buttons for Rescan, Add to Profile, and Connect. A configuration window is open, showing settings for Authentication (WPA-PSK) and Encryption (AES). The WPA Preshared Key field is filled with asterisks. There are also four Wep Key fields, each with a radio button and a Hex input field.
