The only thing is that I cant manually add maps through that Maps/custom thing Tell me which maps (and from which link) are you trying to add so that I can try to add them to my game when I get a chance.. Ra2 and yr didn't have map folders at release At least mine didn't either And still doesn't now.

So i just put all maps at the ra2 folder not the yuri folder regardless of the extension? I wouldn't advise placing all the maps in the Maps > Custom folder, as some may be corrupt and the rendering might break the client.. And you never have to download an official map, but if they can't have an identical name anymore as the official maps it helps a lot too, since that's how they put people off-guard..
